

DIGITAL TEACHING IN VET SYSTEM

2019-1-PL01-KA202-065064

Supports the objectives set out in national and European strategies for applying ICT to VET systems through teachers/trainers training.

Objectives:

-  Development of systematic approaches and opportunities for the professional growth of VET teachers/trainers based on the development and innovation of education and training methods which are digital, open, innovative and effective.
-  Improvement of the technical knowledge and expertise of VET teachers/trainers about the use of innovative and digital teaching methods by creating training pathways, training staff events and VET qualifications which will comply with EQF, ECVET and EQAVET European tools of recognition and transparency.

Activities:

-  Handbook of Digital Learning applied to Vocational Training.
-  Competence profile of “Experts in digital and immersive teaching for vocational training”.
-  E-learning course targeted to “Experts in digital and immersive teaching for vocational training”.
-  i-Did: Application for digital and immersive teaching.
-  Assessment and self-assessment pathway of the suitable skills for the expert in digital and immersive teaching for vocational training.

Partners:

Akademia
Humanistyczno-Ekonomiczna w Łodzi

Meetings :

Due to the pandemic, we have organised, till now, only one meeting, the Kick-off meeting.

After forgetting the lockdown and the end of the restrictions, we were able to meet again to celebrate the planned learning activity in Lodz.

Thanks to it, VET teachers and trainers from the different countries of the consortium where different systems and procedures are adopted, have had the opportunity to exchange ideas, become familiar and experiment with teaching methodologies that use digital, mobile and virtual/augmented reality applied to professional training.

The course lasted five days with the general objective of creating a European association between teachers and vocational training centres aimed at developing opportunities for the professional growth of VET teachers/trainers based on the development of education and training methods that be digital, open, innovative and effective.

Different activities were developed within the training course, such as the practical use of the flipped classroom methodology with the support of digital tools or the study visit to the Centre for Comics and Interactive Narration in Lodz
